## Technical Skills

---

**Languages:** Python, Java, C, C++, TypeScript, HTML/CSS, JavaScript

**Frameworks:** React, Next.js, Redux, Recoil, tailwindcss, Framermotion, Node, tRPC, Express, django, WebRTC, Costumhook, graphql, Redis

**Database And Devops:** SQL, Prisma, MongoDB, Docker, AWS(EC2ands3), Git/GitHub, CI/CD

- Data Structures And Algorithms
- Object Oriented Programming
- Database Managemen System

## Experience

---

### Layer UI

march 2024 – Present

*Full Stack Developer, Founder*

*Remote*

- Developed an open-source UI component library using React, incorporating pre-built components and Framer Motion animations to enhance smooth interactions and usability.
- Achieved over 6,000 unique visitors, empowering developers to build 10x faster and more efficiently by offering modern, trending components that streamline the development process.
- Link: <https://www.layerui.com/>

### Freelance Developer

Jan 2024 – March 2024

*Full Stack Developer*

*Hyderabad, Telangana*

- Developed end-to-end web and native applications using React, Next.js, Prisma, Firebase, React Native, Supabase, SQL, and TailwindCSS based on client needs.
- Completed projects for 6+ clients, increasing website traffic by 60 to 100 percentage, with excellent feedback for quality, efficiency, and user-friendly design .

### WECODE

Jan 2023 – April 2023

*Web Development Intern*

*Hyderabad, Telangana*

- Built and enhanced the UI for both student and teacher sides of the course web application, making the interface more user-friendly and improving engagement.
- Optimized backend performance to boost website speed and implemented end-to-end PDF storage for class notes using S3, increasing student interactions by 100+.

## Projects

---

**CHATDOC** | *Next.js, React, LangChain, OpenAi api, tRPC, Turbo repo, AWS (s3)*

Oct2023 - Dec2023

- Developed an AI-driven document chat system, enabling users to upload documents and receive context-aware responses based on the provided content.
- Implemented an innovative document chat system integrating AI for context-aware interactions, optimizing productivity while fostering intuitive engagement between users and documents
- Project-Github-Link:// [source codchatdoc.ai](#)

**SPECTO** | *React, Typescript, Nextjs, Tailwindcss, Socket.io*

Aug2023-Oct2023

- Specto transforms agency management with its comprehensive suite of tools, facilitating goal setting, progress tracking, and web design—all in one platform.
- Through its intuitive interface and dynamic charting capabilities, Specto simplifies multitasking and optimizes performance monitoring, empowering agencies to achieve their objectives efficiently
- Project-Github-Link:// [source codchatdoc.ai](#)

## Education

---

**OSMANIA UNIVERSITY**

2021 – 2024

*bsc in Computer Scienc*

*CGPA:8.0 / Hyderabad, India*

## COURSE

---

**100XDEVS**

Jun2023 – Dec2023

*Student*

*Remote*

- Completed "100xDevs" course, gaining expertise in MERN stack development, basic DevOps principles, version control with Git, backend fundamentals, and WebRTC technology for real-time communication applications.
- Gained hands-on experience in auto-scaling backend development through practical projects, enhancing understanding of code formats by exploring open-source projects.
- Improved coding speed and proficiency in version control by actively using Git for collaboration on multiple development tasks.
